

INSPIRE brings over **20 (twenty)** years of expertise as a software technology consulting and development company. Initially focusing on traditional IT services, we've seamlessly transitioned to become leaders in AWS Cloud-based IT infrastructure, managed services, and IT security solutions. Additionally, we offer comprehensive capabilities in Web, Mobile, and AI Chatbot App development.

Our journey reflects the evolution of technology, as we've embraced the paradigm shift towards cloud computing and digital transformation. Partnering with Corporates, Govt. PSUs and Departments, INSPIRE delivers tailored Software Development and Managed Services, leveraging our extensive experience based boutique IT consulting and services company. We do Plan, Design, Build, Integrate, Run and Manage sophisticated infrastructure solutions and software applications. Our clients range from Fortune level Indian enterprises to Govt Alley Nodal Agencies. We are technology agnostic, and have a long track record of successfully delivering the right solutions using the right technology.

Empanelment's: NICSI, CSC, DIC, EdCIL

Practice Areas

- Cloud Services & IT Managed Operations
- Web, Mobile & AI Chatbot Software Development
- Pre-Build Ready to Implement Industry Vertical Pack
- Enterprise AI-Suites
- UI/UX Design Studio

What Makes Us Different

- Experienced & Cross-trained Industry Expertise Team
- Seasoned & Skilled Technology professionals
- 20+ year of happy clients and successful engagements
- Expertise in full lifecycle of IT solutions delivery: from Infrastructure, Architectural Design, Development, Implementation and Operational Support Services.
- Strong, Proven & Quality Pre-Build Library
- Customer Specific, Optimized Cost & Fit-in-budget
- Unmatched Industry vertical domain Functional & Technical knowledgeable resources.

Solutions Sweet Spot

AWS Cloud Architectures & Platform Migration

Strong expertise with a variety of AWS technologies and workloads; Hybrid architectures; Networking, security and storage solutions; Backup and DR solutions

Managed Services: CloudOps, DevOps, ProdOps

Strong Expertise with a variety of DevOps tools and technologies; Automation, configuration management, continuous deployment technologies; Monitoring and management; Datacenter augmentation and operations

Software Solutions

Development expertise with a variety of open-source and database technologies; Android, iOS mobile & Hybrid development environment.

Legacy Application Integration & DB Migration

Application integration & DB Migration expertise with legacy systems (ERP, HR, CRM, & SRM) for manufacturing & Service based Industries along with Typical Govt. Operations.

Customer Sweet Spot

Large Enterprises

1. Jindal Steel & Power: We work with large multi-vendor teams on software infrastructure development, Program Management, Web Presence and provide execution through senior partner-level involvement

Mid-size Businesses and Well-funded Startups
