

Simplify Workflows and Strengthen Security With HP Print Solutions From MicroAge

Why Businesses Are Upgrading Their Print Environments

Your office printer doesn't get much credit, but it does a lot of work. From digitizing documents to powering everyday tasks, printers sit at the intersection of physical and digital workflows. When outdated or mismanaged, they quietly drain time, budget, and security, impacting your bottom line.

Employee Productivity

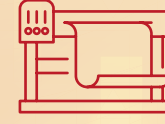

IT Efficiency

Aging printers silently drain IT resources.

3.5 HOURS

IT teams spend **3.5 hours** per printer each month on firmware and hardware upkeep.²

Consolidated fleet management and automated updates reduce maintenance time and allow IT to focus on strategic priorities.

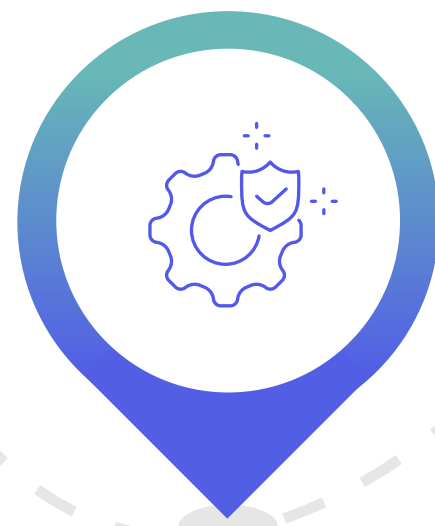

Endpoint Security

Printers are a common blind spot in business security strategies.

Just **36%** of IT and security decision-makers apply firmware updates for printers promptly, leaving devices vulnerable to breach attempts.²

Built-in security hardens the print fleet against modern threats and helps enforce compliance.

To overcome these challenges, organizations are partnering with MicroAge to modernize their print environments with HP Office Print Solutions that simplify workflows, strengthen protection, and reduce overhead across every workspace.

3 Ways HP + MicroAge Help Your Team Work Smarter

From cloud-connected printing to built-in security, HP Office Print Solutions delivered by MicroAge empower employees and reduce IT overhead across every workspace.

Boost Productivity With Smarter Workflows

AI-driven automation cuts manual steps and keeps work flowing.

HP Smart App and HP Workpath enable one-step digitization, routing, and sharing, reducing friction across hybrid teams.

Simplify IT With Smarter Management

HP Smart technologies reduce manual oversight and keep devices performing reliably.

Self-healing connectivity, automatic updates, and proactive alerts minimize hands-on maintenance, helping IT teams save time and focus on strategic priorities.

Protect Data With Built-In Endpoint Security

HP Wolf Security defends devices before attacks can spread with hardware-level, self-healing protection that detects and recovers from firmware attacks, reducing print-related breaches by up to 40%.²
