

Empower your team. Evolve your business.

HP printing solutions, delivered by MicroAge, help small and midsize organizations work faster, smarter, and more securely.

From employee onboarding to digital records, printers and multifunction printer (MFP) devices still play a vital role in how modern businesses operate. However, outdated devices and unprotected print environments can hinder teams, overburden IT, and expose them to costly security threats.

MicroAge and HP help small and midsize businesses (SMBs) turn printing into a strategic advantage. With expert guidance and access to HP's latest office printers, MicroAge empowers your team to upgrade aging print infrastructure with devices that are faster, smarter, and more secure.

Whether you're printing, scanning, or sharing documents, MicroAge helps your teams get the tools they need to work efficiently, and your IT team gets peace of mind knowing the entire fleet is protected.

The hidden cost of legacy printers

Outdated print fleets may seem functional, but behind the scenes, they quietly drain resources and expose your business to risk. Lost productivity, frequent service calls, and inefficient workflows add hidden costs that ripple across the business.

- 56% of organizations experienced at least one print-related data loss incident in the past year.¹
- Just 36% of IT teams apply printer firmware updates promptly, leaving a critical security gap.¹
- IT teams spend 3.5 hours per printer per month managing hardware and firmware security issues.²

Three benefits of upgrading with HP + MicroAge

1 | Empower teams to be more productive

Intuitive HP printers make it easier for your employees to print and scan what they need, without slowing down IT.

- Built-in workflow shortcuts and mobile-ready apps support hybrid teams and busy departments, enabling seamless collaboration.
- HP Smart Admin dashboard and auto-replenishment options help reduce user frustration and manual IT tasks.
- Long-life cartridges and smart maintenance alerts help prevent costly downtime.

2 | Defend your network

SMB leaders often overlook printers and scanners in their security planning, but these devices remain high-value targets for cyberattacks.

- HP printers equipped with HP Wolf Pro Security use hardware-enforced protection, threat containment, and self-healing firmware to safeguard devices from the BIOS level and above.
- With FutureSmart firmware, your HP printer fleet stays up to date against the latest threats.
- Native security controls and reporting make it easier to meet compliance requirements and reduce risk.

3 | Enable digital workflows across your organization

HP printers support fast, high-quality printing and scanning, without adding cost or complexity.

- Digitize documents at the point of need with reliable scan-to-cloud and scan-to-email functionality.
- Support employee productivity with advanced paper handling, automated workflows, and cloud connectivity.
- Energy-efficient designs and default duplex printing help meet sustainability goals.

Explore the HP portfolio

Whether you're outfitting home offices or upgrading to support your entire office, HP has a printer that fits your performance and scalability needs. Explore the device options below, organized by team size and print volume.

Small teams & home offices

- *HP LaserJet Pro printers*
- Professional-grade output in a compact footprint. Ideal for hybrid or remote teams with 1–5 users.

Growing teams

- *HP Color LaserJet Enterprise MFP devices*
- Enterprise-class speed, versatility, and protection for small offices and shared departments of 5–20 users.

High-volume offices

- *HP LaserJet Enterprise printers*
- Blazing speed, lower cost per page, and eco-friendly performance for larger SMB teams of 20 or more with high-volume needs.

Realizing your IT goals with HP + MicroAge

With decades of experience, MicroAge helps SMBs navigate IT decisions with confidence. As an HP Amplify Power Partner, we simplify procurement, configuration, and support to ensure your print investment aligns with your business goals, user needs, and security standards, providing high performance, low friction, and peace of mind from day one.
