

Design Without Limits: Power Up With HP Z Workstations and AMD

Challenges With Standard Workstations

Lag and stuttering during
3D rendering

Frequent crashes in CAD
or simulation software

Long wait times for
simulations to complete

Complicated multitasking
across apps and
multiple data types

Limited memory and
storage for large
design files

Security risks on aging
systems with end of
support for Windows 10

Benefits With HP Z Workstations & AMD Ryzen™ AI Max PRO Series Processor

Smooth 3D workflows with
professional-grade GPUs

Robust stability tested for
mission-critical reliability

High core and thread count
from AMD processors accelerate
simulation and rendering

ISV-certified performance
for software apps like
SOLIDWORKS, Creo,
and Keyshot

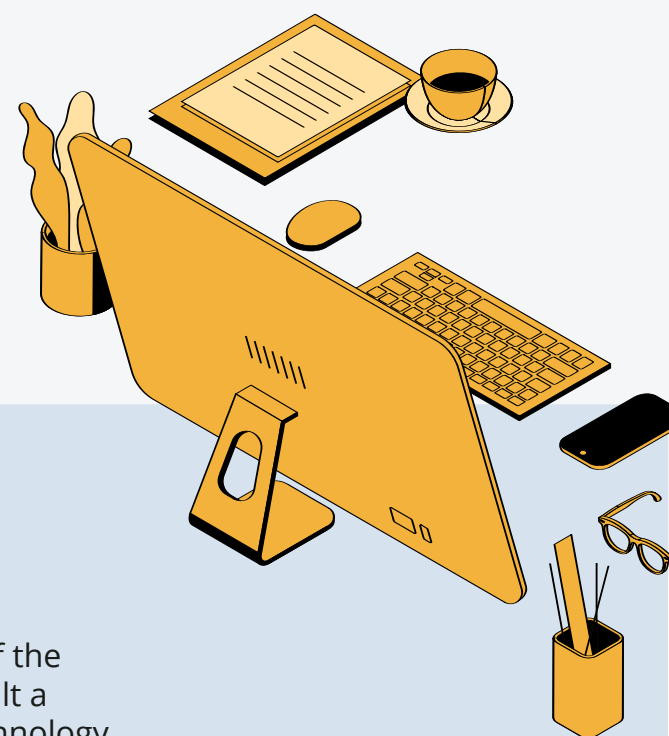

Expandable memory and
storage to handle massive
CAD assemblies

Windows 11 with Microsoft
Copilot for modern
productivity, collaboration,
built-in security, and
future-ready support

Ready to power your next breakthrough with HP Z Workstations powered by AMD?

your workflow. **Contact a Sehi professional today.**

About Sehi Computer Products

Family owned and operated since 1983, Sehi Computer Products has become one of the largest independent technology solution providers in the United States. We have built a solid reputation based on our technical expertise and ability to provide valuable technology solutions while meeting customer budgets and needs. Our portfolio includes desktop computers, mobile computing, servers, printers and supplies, networking equipment, and data storage systems, plus multiple other IT solutions. With a diverse array of loyal customers varying from the education, government, and healthcare industries to small business to enterprise level and consumers, Sehi provides services to customers both large and small. With locations in both Michigan and California, Sehi is ready to serve you!
